

# LS BULK HEAD EMERGENCY LIGHT

ENSURE YOUR BUILDING IS ILLUMINATED IN EMERGENCIES WITH OUR RELIABLE BULK HEAD EMERGENCY LIGHTS

The Self-testing bulk head lights check themselves automatically to ensure that the battery and lamp in each emergency light are fully operational. The self-test feature replaces the manual tests carried out monthly and annually. If a problem is detected by the self-test the system will display a visual warning and sound an audible warning..

The bulk head will perform its own self-checks at regular intervals and provide a visual indication if a fault is found.

## LS BULK HEAD | LS-638LMS

IP65 waterproof-level

L.E.D illuminate life span is particular long

Advanced circuit design, highly efficient, low power consumption, energy conservation & environmental protection

We develop and use long-life LEDs and the extraordinary circuit in this design.

It is highly efficient and energy saving with small power consumption.

The circuit is controlled by IC with small components that includes multi-function, such as battery discharge protection, LED indicator etc, to ensures the effective performance of the fitting.

## SPECIFICATIONS

Operating environmental temperature: 0 - 40°C

Operating relative humidity: less than 90%

Rated voltage: 220-240V 50/60Hz

Rated power: 3.5 W

LED: SMT 5730LED\*10pcs

Lumens: 160lm(M) , 140lm(NM)

Emergency duration: more than 3 hours

Battery installed or replaced: 3.6V 1.5Ah Ni-Cd

Fuse installed or replaced: 1A 250V

Recharge time: 24 hours

## LS-638LMS - BULK HEAD

Flame retardant poly-carbonate (PC) housing and diffuser

Self-adhesive legend available as extra for exit application

With SMD LEDs

IP65 - weather proof

Designed for indoor and outdoor applications

### Product size

L 352mm | W 110mm | H 67mm
